

Adobe Converter Userguide

Preparation

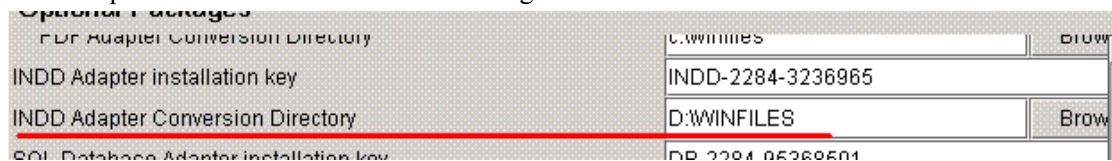

1. Install Adobe InDesign CS2 application
2. Install Adobe Illustrator CS2 application
3. Microsoft Windows environment.

Usage

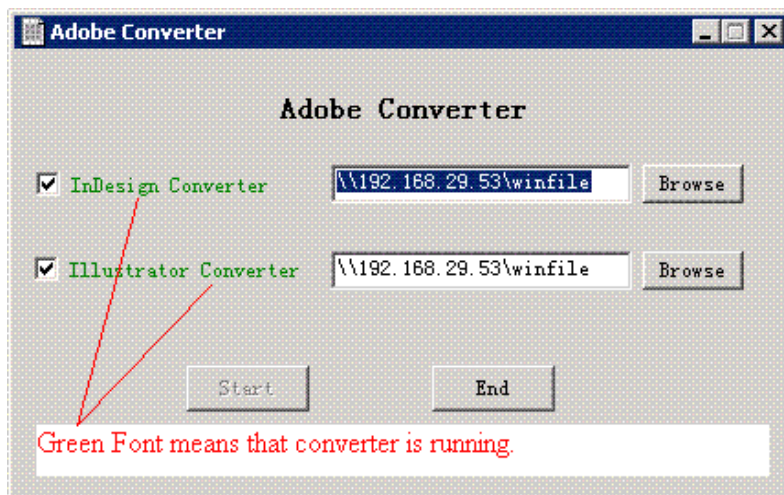

1. Unzip the file “AdobeConverter.zip” to a place, for example “D:\AdobeConverter”.
2. Double click the file “AdobeConverter.exe” to run the application.
3. Select the converter by checking on the corresponding checkbox.
4. Click the “Browse” button to select the right path so that the converter can communicate with Ambassador.

And this path should be same as what is configured in Ambassador Installation UI.

5. Click the “Start” button to run the converters.

If you want to run Adobe Converter Windows application and Ambassador in different machines, please make sure you have the writing privilege against the remote path (in this case, it is “\\192.168.293.53\winfile”). You can check this via IE.

6. Select the converter and click “Stop” button to stop it.

Note: The window of the Adobe Converter application will minimize as a Windows system tray icon if you try to minimize the window. The window will appear by double click the Window system tray icon.
